

SAP Analytics Cloud (SAC)

40-Hour Training Program for SAP Consultants

Course Overview

This program is designed for SAP consultants who need a comprehensive, hands-on grounding in SAP Analytics Cloud (SAC) — covering Business Intelligence, Planning, and Predictive/Augmented Analytics. Delivery is structured as one 1-hour session per day for 40 days, covering 40 modules end to end. A separate block of 5 additional 1-hour Q&A/case-clinic sessions (Days 41-45) follows the core curriculum, over and above the 40 content hours.

Target Audience

- SAP functional/technical consultants (BW, BPC, FI/CO, S/4HANA) transitioning to SAC
- BI/Analytics consultants supporting SAC implementation projects
- Solution architects evaluating SAC for reporting and planning use cases

Prerequisites

- Basic understanding of SAP data structures (tables, InfoProviders, or CDS views)
- Familiarity with reporting/BI concepts is helpful but not mandatory

Learning Objectives

- Build and validate SAC data models from live and imported sources
- Design interactive stories, dashboards, and analytic applications
- Configure planning models, data actions, and predictive forecasts
- Apply security, governance, and content lifecycle best practices
- Integrate SAC with S/4HANA, BW/4HANA, and SAP Datasphere

Module & Hour Distribution

Module Area	Hours	% of Course
Foundations, Architecture & Connectivity	7 hrs	17.5%
Data Modeling	8 hrs	20%
Stories & Visualization	8 hrs	20%
Analytics Designer / Apps	4 hrs	10%
Planning	6 hrs	15%
Predictive & Smart Features	2 hrs	5%
Security, Application Design & Mobile	3 hrs	7.5%
Integration & Content Lifecycle	2 hrs	5%

Module Area	Hours	% of Course
Total (Core Curriculum)	40 hrs	100%
Q&A / Case Clinic (additional)	5 hrs	not part of the 40

Day-Wise Summary (40 daily 1-hour sessions + 5-hour Q&A)

Day(s)	Duration	Focus
Days 1-8	8 hours	Foundations: SAC overview, architecture, connectivity
Days 9-15	7 hours	Data modeling: dimensions, measures, currency, versions, governance
Days 16-23	8 hours	Stories & visualization, hands-on build labs
Days 24-27	4 hours	Analytics Designer & optimized story experience
Days 28-33	6 hours	Planning: data actions, allocations, value driver trees
Days 34-39	6 hours	Predictive/Smart features, security, application design
Day 40	1 hour	Integration & content lifecycle best practices
Days 41-45	5 hours	Q&A / Case Clinic (in addition to the 40 content hours)

Detailed Session-Wise Lesson Plan (40 Hours)

Day	Hrs	Module / Topic	Key Content Covered
Day 1	1 h	Module 1: Introduction to SAP Analytics Cloud (SAC)	SAC overview & positioning; BI + Planning + Predictive in one suite.
Day 2	1 h	Module 2: SAC Architecture & Licensing	Cloud architecture; Edge vs Cloud licensing models; tenant structure.
Day 3	1 h	Module 3: SAC vs BEx/BW Reporting	Comparison with classic SAP reporting tools; roadmap and release cycle.
Day 4	1 h	Module 4: Data Connectivity Overview	Live vs Import connections; when to use each; connection types available.
Day 5	1 h	Module 5: Connecting to S/4HANA & BW/4HANA(Theory)	Live connections to S/4HANA and BW/4HANA; CDS views as sources.
Day 6	1 h	Module 6: Connecting to HANA Cloud & SAP Datasphere(Theory)	Live data fabric connectivity; semantic usage type; performance considerations.
Day 7	1 h	Module 7: Connecting to Excel, Flat Files & OData, Datasphere	Import connections; OData services; connection troubleshooting basics.

Day	Hrs	Module / Topic	Key Content Covered
Day 8	1 h	Module 8: Data Modeling: Model Types	Account-based vs Measure-based models; choosing the right model type.
Day 9	1 h	Module 9: Dimensions, Hierarchies & Attributes	Building dimensions; parent-child and level-based hierarchies; attributes.
Day 10	1 h	Module 10: Measures & Calculated Measures	Defining measures; calculated and restricted measures; formulas.
Day 11	1 h	Module 11: Import Data Wizard & Model Validation	Import wizard walkthrough; validating and troubleshooting a new model.
Day 12	1 h	Module 12: Currency Conversion	Currency conversion setup; exchange rate types and tables.
Day 13	1 h	Module 13: Version Management	Public vs private versions; version management for actuals/plan/forecast.
Day 14	1 h	Module 14: Data Actions on Models	Public vs private dimensions; triggering data actions on models.
Day 15	1 h	Module 15: Model Auditing & Governance	Auditing changes; governance practices for enterprise models.
Day 16	1 h	Module 16: Stories: Canvas vs Grid Page	Story canvas vs grid/table page types; when to use each.
Day 17	1 h	Module 17: Charts & Tables	Building and formatting charts and tables in a story.
Day 18	1 h	Module 18: Geo Maps & Widgets	Geo map visualizations; adding widgets (images, shapes, buttons).
Day 19	1 h	Module 19: Filters & Linked Analysis	Story filters; input controls; linked analysis across panels.
Day 20	1 h	Module 20: Responsive & Mobile Stories	Designing stories for tablet/mobile; responsive layout page type.
Day 21	1 h	Module 21: Storyboard Best Practices	Layout, color, and UX best practices for enterprise storyboards.
Day 22	1 h	Module 22: Hands-On Story Build Lab (Part 1)	Guided lab: building an end-to-end story from a live model.
Day 23	1 h	Module 23: Hands-On Story Build Lab (Part 2)	Lab continued: refining visuals, filters, and formatting.
Day 24	1 h	Module 24: Analytic Applications Overview	Introduction to Analytics Designer and analytic applications.
Day 25	1 h	Module 25: Scripting Basics (Analytics Designer API)	Scripting fundamentals; widget events and API basics.
Day 26	1 h	Module 26: Custom Widgets & Interactive App Build	Building a simple interactive analytic application.

Day	Hrs	Module / Topic	Key Content Covered
Day 27	1 h	Module 27: Optimized Story Experience	Converting stories to the optimized (scripting-enabled) story experience.
Day 28	1 h	Module 28: Planning: Models & Versions	Planning model setup; version types for planning cycles.
Day 29	1 h	Module 29: Data Actions (Basic)	Building basic data actions for planning calculations.
Day 30	1 h	Module 30: Advanced / Multi-Action Data Actions	Chaining multiple data actions; advanced formulas.
Day 31	1 h	Module 31: Allocations	Configuring allocation logic for cost/revenue distribution.
Day 32	1 h	Module 32: Value Driver Trees	Building value driver trees for driver-based planning.
Day 33	1 h	Module 33: Predictive Planning & Approval Workflows	Predictive planning features; approval workflow configuration.
Day 34	1 h	Module 34: Smart Insights & Smart Discovery	Automated insight generation; Smart Discovery walkthrough.
Day 35	1 h	Module 35: Search-to-Insight & Predictive Forecasting	Natural-language search; Smart Grouping; time series forecasting.
Day 36	1 h	Module 36: Security: Teams & Roles	Team-based security; role assignment; row-level (data) security.
Day 37	1 h	Module 37: Content Authorizations & Sharing	Content-level authorizations; sharing stories and folders.
Day 38	1 h	Module 38: Application Design End-to-End & Mobile	Building a complete analytic application; SAC mobile app.
Day 39	1 h	Module 39: Digital Boardroom	Digital Boardroom setup for executive reporting; presentation mode.
Day 40	1 h	Module 40: Integration & Content Lifecycle	SAC with Datasphere/S/4HANA/BPC; content transport; best-practice checklist.

Q&A Session Schedule (5 Hours — Additional)

The 5-hour Q&A/case-clinic block runs after the 40-hour core curriculum, as 5 additional 1-hour daily sessions. It is not counted within the 40 content hours.

Day	Hrs	Module / Topic	Key Content Covered
Day 41	1 h	Q&A / Case Clinic Session	Open Q&A on foundations, connectivity & data modeling (Modules 1-15).
Day 42	1 h	Q&A / Case Clinic Session	Open Q&A on stories & visualization (Modules 16-23).

Day	Hrs	Module / Topic	Key Content Covered
Day 43	1 h	Q&A / Case Clinic Session	Open Q&A on Analytics Designer & Planning (Modules 24-33).
Day 44	1 h	Q&A / Case Clinic Session	Open Q&A on predictive, security & application design (Modules 34-39).
Day 45	1 h	Q&A / Case Clinic Session	Final recap across all 40 modules; certification exam tips; feedback & next steps.

Delivery Notes

- Format: Instructor-led (virtual or classroom), hands-on labs in a live SAC tenant
- Batch size: Recommended 8–15 participants for effective hands-on support
- Tools required: SAP Analytics Cloud trial/tenant access, sample datasets
- Each module includes a short knowledge-check exercise
